EXPERIMENT 4

Student Admission Enquiry Form
Data Modelling and Form Design in Zoho Creator

Student Admission Enquiry Form — Basic Fields Use Case

Submitted by

Madhumitha P

Register Number: 241401049

Aim

To design a data model and build a business application form in Zoho Creator for managing student admission enquiries, and to demonstrate the creation of all thirteen Basic Field types, the configuration of field-level validations, and the generation of report data from submitted records.

Procedure

1. Log in to Zoho Creator and create a new application titled "Student Admission Enquiry Management".

2. Create the form "Admission_Enquiry_Form" and add the Personal Details fields: Student Name (Name field), Date of Birth (Date field), and Gender (Radio).

3. Add the Contact Details fields: Email Address (Email field), Contact Number (Phone field), and Residential Address (Address field).

4. Add the Guardian & Academic Details fields: Guardian Name (Single Line), Class XII Percentage (Number field), Preferred Course (Drop Down), and Areas of Interest (Multi Select).

5. Add the Scheduling & Consent fields: Preferred Counselling Time (Time field), Additional Remarks (Multi Line), and consent to the Terms & Privacy Policy (Checkbox).

6. Configure field properties in the form builder — field link names, mandatory validation on Name, Email, Phone, Date of Birth, Gender, Preferred Course and Terms Agreement, email and phone format validation, a numeric range restriction of 0–100 on Class XII Percentage, and a restriction disallowing future dates on Date of Birth.

7. Preview and fill out the Admission_Enquiry_Form with sample applicant data, and submit the form.

8. View the submitted record in the Admission_Enquiry_Report to verify that the data has been captured and stored correctly.

Data Model

The application uses an Admission_Enquiry_Form built entirely from Zoho Creator's Basic Fields, mapped to the fields the Admissions Office needs to process a prospective student's enquiry. The table below maps every Basic Field from the Form Builder palette to its role in the form, and Fig. 1 shows the entity-relationship diagram: the Admission_Enquiry links to the Course the applicant is choosing, and to one or more Interest areas the applicant has selected.

241401049

Basic Field	Form Field Name	Purpose	Sample Value
Name	Student_Name	Captures the full name using First/Last name sub-fields	Divya Ramesh
Email	Email_Address	Captures a validated email address	divya.ramesh@example.com
Phone	Contact_Number	Captures a validated mobile number	+91 98765 43210
Address	Residential_Address	Captures the full postal address with city, state, pincode	12, Anna Nagar, Chennai, TN, 600040
Single Line	Guardian_Name	Captures parent/guardian name as free text	R. Ramesh
Multi Line	Additional_Remarks	Captures free-text remarks about the course choice	Interested in AI & Data Science
Number	Class_XII_Percentage	Captures numeric value with validation for marks	92
Date	Date_Of_Birth	Captures date of birth using date picker	14-Mar-2008
Time	Preferred_Counselling_Time	Captures preferred time slot for counselling call	11:00 AM
Drop Down	Preferred_Course	Presents single-select list of programmes	B.Tech - AI & Data Science
Radio	Gender	Captures mandatory single selection (Male/Female/Other)	Female
Multi Select	Areas_Of_Interest	Allows selection of multiple interest areas	Robotics, Coding Club, Sports
Checkbox	Terms_Agreement	Captures consent to terms and privacy policy	Checked (Agreed)

Output

The following screenshots illustrate the complete workflow: the Admission_Enquiry_Form built in the Form Builder, the live form as seen by an applicant, and the output data captured after submission.

1. Form Builder — All 13 Basic Fields

The screenshot below shows the Admission_Enquiry_Form built with all thirteen Basic Fields, organized into the four sections: Personal Details, Contact Details, Guardian & Academic Details, and Scheduling & Consent.

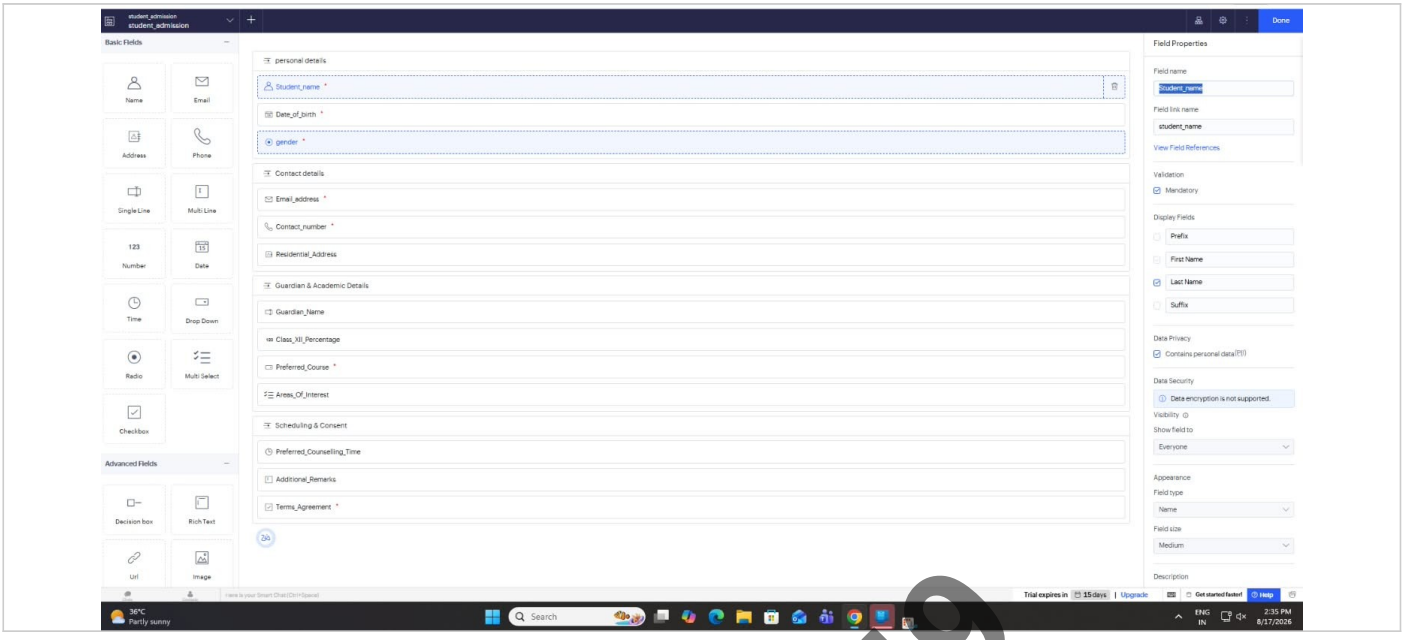

Fig. 2 — Form Builder showing all 13 Basic Fields configured in sections

Key Observations

- All thirteen Basic Fields — Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, Drop Down, Radio, Multi Select, and Checkbox — are present on the canvas, confirming full coverage of the Form Builder palette.
- Fields are grouped under four section headers (Personal Details, Contact Details, Guardian & Academic Details, Scheduling & Consent) for a logical, easy-to-scan layout.
- The Field Properties panel on the right shows the Student_Name field selected, with its Field Link Name (student_name), Mandatory validation enabled, and Last Name display sub-field turned on.
- Mandatory fields — Student Name, Date of Birth, Gender, Email Address, Contact Number, Preferred Course, and Terms Agreement — are marked with a red asterisk in the builder.
- The Data Privacy setting flags the Student_Name field as containing personal data (PII), which is appropriate for an admissions record.

2. Live Form Preview

The screenshot below shows the live Admission_Enquiry_Form as seen by an applicant, with all fields ready for data entry.

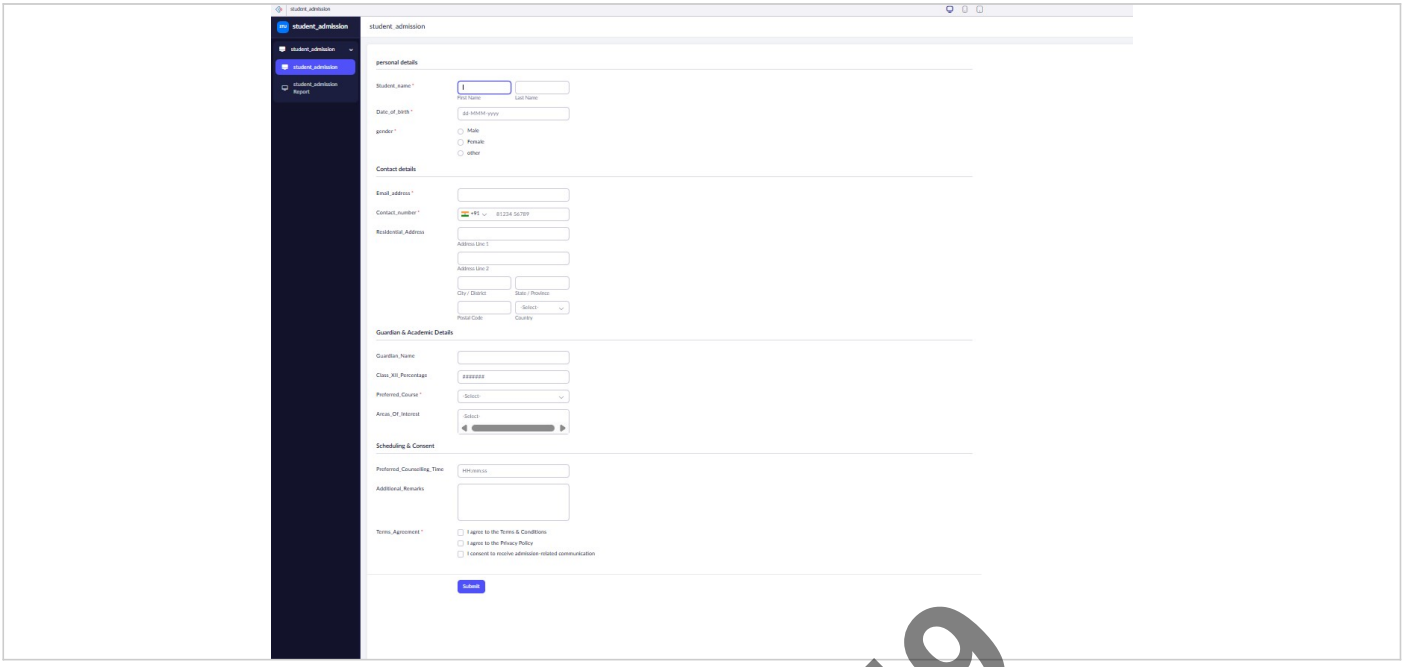

Fig. 3 — Live form preview showing all fields

241401049

Key Observations

- The public-facing form renders all four sections in order, matching the structure configured in the Form Builder.
- The Student Name field correctly splits into First Name and Last Name sub-fields, and Date of Birth shows the expected dd-MMM-yyyy input mask.
- Contact Number displays with an India country-code selector (+91) and a formatted placeholder, confirming phone validation is active.
- Residential Address expands into the full multi-line layout (Address Line 1/2, City/District, State/Province, Postal Code, Country) provided by the Address field type.
- Gender is presented as three mutually exclusive radio options (Male / Female / Other), and Terms_Agreement lists three separate checkbox items for consent.
- A single Submit button appears at the bottom, confirming the form is ready to accept and validate applicant input.

3. Submitted Records — Admission_Enquiry_Report

The screenshot below shows the submitted records in the Admission_Enquiry_Report, confirming that the data has been captured and stored correctly.

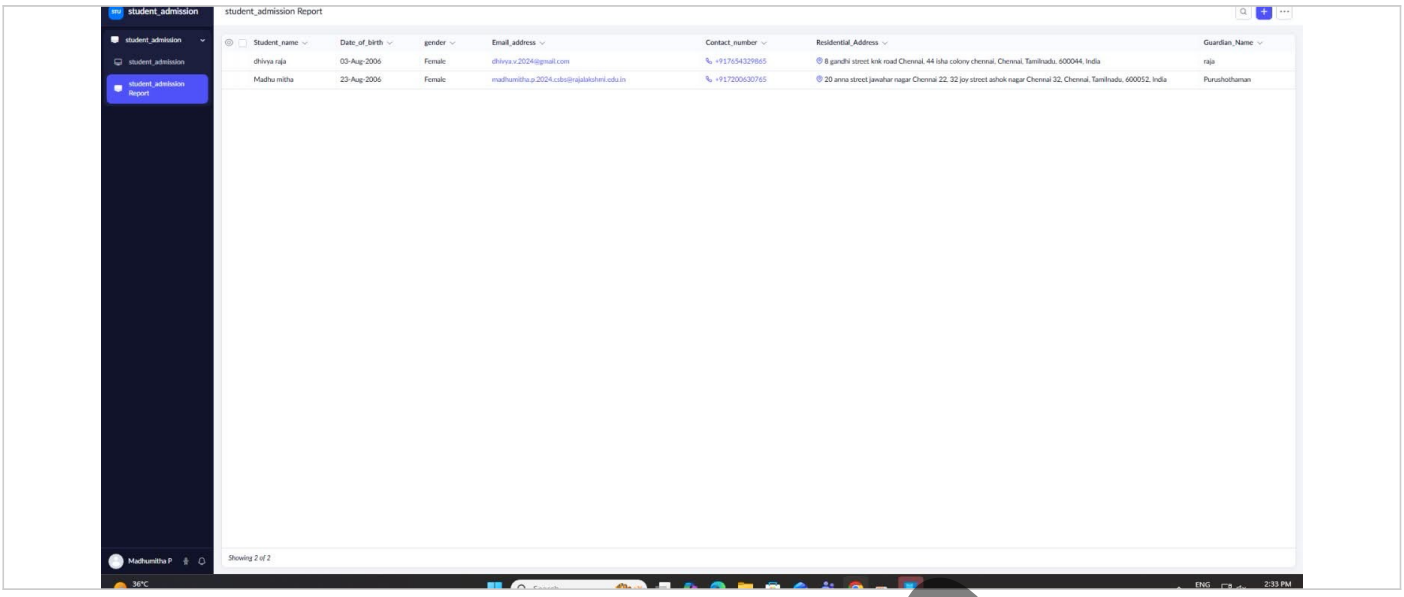

Fig. 4 — Admission_Enquiry_Report showing submitted student records

Key Observations

- The report view lists two submitted enquiries, each populated with Student Name, Date of Birth, Gender, Email Address, Contact Number, Residential Address, and Guardian Name.
- Column headers are sortable/filterable (indicated by the dropdown arrows), which lets the Admission Cell filter enquiries — for example, by Preferred Course — as described in the workflow.
- Email Address values render as clickable mailto links, confirming the Email field's built-in format validation accepted only well-formed addresses.
- The record count ("Showing 2 of 2") confirms that every form submission was persisted correctly with no data loss.
- This report is the source the Admission Cell would use to schedule counselling calls at each applicant's Preferred_Counselling_Time.

Result

An Admission_Enquiry_Form was successfully designed and built in Zoho Creator using all thirteen Basic Fields available in the Form Builder. The form was structured into four logical sections covering personal, contact, guardian/academic, and scheduling & consent details, with appropriate field-level validations applied. The form was tested by submitting sample applicant data, and the submitted record was verified in the Admission_Enquiry_Report, thereby demonstrating a working business application for managing student admission enquiries.
